

README

SMART PARKING SYSTEM

GROUP 12

Database Connection

1. Install MySQL on your machine. You can get it from [here](#).
2. Install MySQL Workbench on your machine. You can get it from [here](#).
3. Start your MySQL server.
4. If you are using mysql and node js together for the first time, please use this command ``ALTER USER 'root'@'localhost' IDENTIFIED WITH mysql_native_password BY 'password'``. Where text in red should be your password for mysql.
5. Write down code on MySQL workbench and run it. Please make sure you don't have a database named sps. (You can get the code from project -> extra -> database.sql)
6. Change the necessary details like password in app.js. Password will be your MySQL workbench password. (app.js line no. 14)

DATABASE part is all set
